

Hello:

October 2019

Often dubbed the "world's deadliest predator," the mighty mosquito - and the diseases for which it serves as a vector - is once again dominating headlines. An uptick in cases of [Eastern equine encephalitis virus](#) is cause for concern in the U.S., while the Philippines declared a [national dengue epidemic](#) and Ethiopia is dealing with an [outbreak of chikungunya](#). West Nile virus diagnoses jumped by 25% in 2018, according to the CDC. A new study shows that [mosquitoes may carry malaria hundreds of kilometers](#), much farther than previously thought. And, while the Zika virus isn't grabbing headlines like it did in 2016, that [doesn't mean it's gone](#).

The tenacity of the mosquito underlines the continued need for cost-effective, fast and accurate diagnostics, which is our mission at InBios. [Learn more](#).

It's Easier to Find Our Reagents Online

Looking for a reagent on our website but didn't find what you needed? We've recently updated our site, so take a look [here](#). You'll see that our reagents are now grouped by disease areas to make it easier for you to find what you need. Still can't find what you are looking for? Just [ask us](#).

Rise of Tick-Borne Diseases in the U.S.

Over the past decade, tick-borne illnesses have more than doubled in the US, and experts are taking notice. *Scientific American* recently called for [increased research and funding](#). InBios offers a variety of antibodies and antigens for use in research of tick and mite borne diseases. [Learn more](#).

After InBios received the first FDA market authorization for our Zika diagnostic test earlier this year, people took note.

- Stephen Ramirez, MD, a physician in San Antonio, TX, said the test will "make a huge difference in the long run for patients." [Read more.](#)
- CBS News covered the authorization of InBio's Zika kit, highlighting the FDA's work to protect the public health in emergency response situations. [Read more.](#)
- InBios' 2.0 Zika kit was compared to its predecessor, with results confirming "considerable improvement to performance." [Read more.](#)
